A CRM APPLICATION FOR THECHAISHOP&CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application. I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions. Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions. Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development. Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project "A CRM Application for TheChaiShop&Co" focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

TheChaiShop&Co currently manages customer, employer, and enterprise information through manual processes and unorganized record-keeping methods. Sales calculations such as order quantity and total billing are performed manually, which increases the risk of errors and consumes valuable time. Additionally, customer data from online and offline sources is not stored in a centralized system, making it difficult to track purchase history, manage records efficiently, and generate accurate reports.

The absence of automation and structured reporting limits the business's ability to engage customers and make informed decisions. Important activities such as birthday greetings and sales analysis are not systematically managed, leading to missed opportunities for customer engagement and business growth. Therefore, there is a need for a centralized CRM system that integrates data, automates key processes, ensures accuracy, and provides real-time insights to improve operational efficiency and customer relationship management.

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis :

Aspect	Description
Think & Feel	Need accurate customer data and reports
Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss

2.3 Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

3.2 Solution Requirements

Functional Requirements

3.3 Functional Requirements

FR-1: User Login

- The system shall provide secure login access for authorized users.
- Users must authenticate using valid credentials (username and password).
- Access to data shall be controlled using roles and profiles.
- The system shall prevent unauthorized access to sensitive information.

FR-2: Object Creation

- The system shall allow creation of custom objects such as Customer Accounts, Employer Accounts, and Enterprise Accounts.
- Each object shall contain relevant custom fields.
- Relationships (Lookup) between objects shall be established where required.
- Page layouts shall be customized for structured data display.

FR-3: Data Entry

- The system shall allow users to create, edit, and delete records.
- Required fields must be enforced to ensure complete data entry.
- Validation rules shall be applied for Aadhar, PAN, and phone numbers.
- The system shall store both online and offline customer data.

FR-4: Billing Automation

- The system shall automatically calculate Order Quantity using formula fields.
- The Total Bill amount shall be computed automatically.
- Calculations shall reduce manual errors in billing.
- The system shall ensure accuracy and consistency in sales transactions.

FR-5: Report Generation

- The system shall generate Customer and Enterprise Sales Reports.
- Reports shall support grouping and chart visualization.
- Dashboards shall display real-time sales performance.
- Management shall be able to analyze and compare sales data.

FR-6: Email Automation

- The system shall automatically send birthday email notifications to customers.
- Email alerts shall be triggered using flows.
- Automation shall enhance customer engagement.
- The system shall maintain communication history for tracking purposes.

Non-Functional Requirements

NFR-1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help. Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery

Examples:

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example:

When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example:

Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

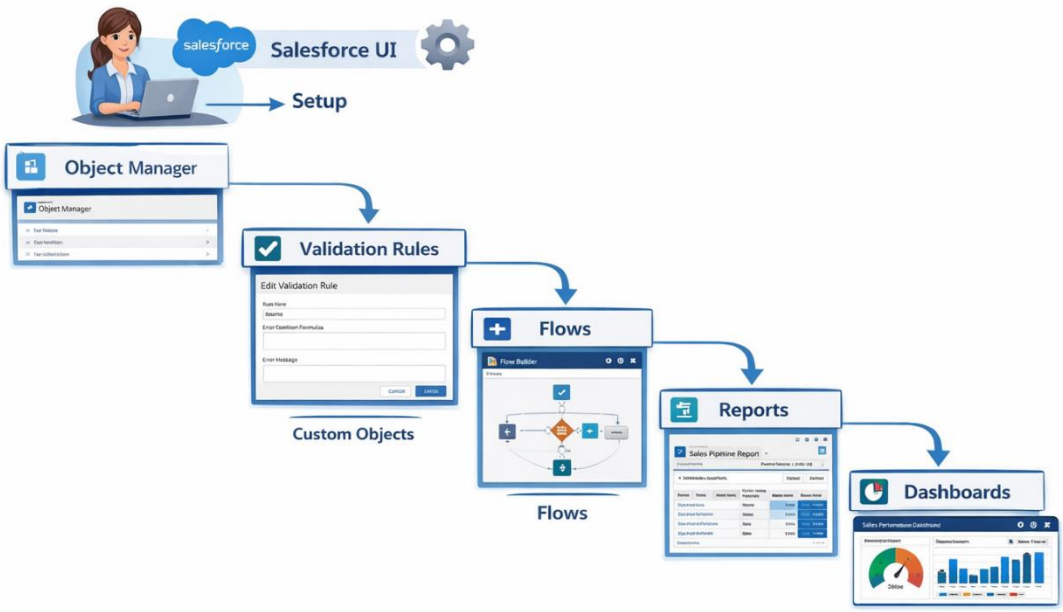
- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example:

If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down. Salesforce infrastructure automatically scales

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.



3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.

Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.
Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

● The project followed an Agile-based development approach with defined milestones and sprints.

● A Salesforce Developer account was created to set up the development environment. ● Custom objects were designed to store customer, employer, and enterprise data.

● Custom tabs and a Lightning Application were developed for easy system navigation.

● Fields, relationships, and global picklists were configured to ensure data consistency.

● Page layouts and record types were created based on user roles and customer categories.

● Validation rules were implemented to prevent incorrect data entry.

● Email templates and automated flows were developed for customer notifications.

● Reports and dashboards were created for performance monitoring and analysis.

● Regular sprint reviews and testing were conducted to track progress and resolve issues.

● The project was completed within the planned timeline through systematic scheduling

Product Backlog, Sprint Schedule, and Estimation

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application	Varshini.N
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	Kumaran.M

Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	Rajesh.T
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard	Vasanth.D
Sprint-2	Data Modeling	USN-1	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	Vasanth.D
Sprint-2	Data Modeling	USN-2	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	Varshini.N
Sprint-2	Data Modeling	USN-3	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently	Kumaran.M
Sprint-3	Automation	USN-4	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	Rajesh.T
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	Rajesh.T

Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	Kumaran.M
Sprint-3	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions	Varshini.N
Sprint-1	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	Vasanth.D

Project Tracker, Velocity & Burndown Chart

Duration	SprintStart Date	Sprint End Date (Planned)
4days	26\02\2026	26\02\2026
4days	27\02\2026	27\02\2026
4days	28\02\2026	28\02\2026
4days	0103\2026	0103\2026

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships

Milestone 7 : Creation of Page Layout

Milestone 8 : Creation of Record Types

Milestone 9 : Validation rules

Milestone 10 : Email Templates

Milestone 11 : Flows

Milestone 12 : Reports and Dashboards

Milestone 13 : Conclusion

6.2 Implementation

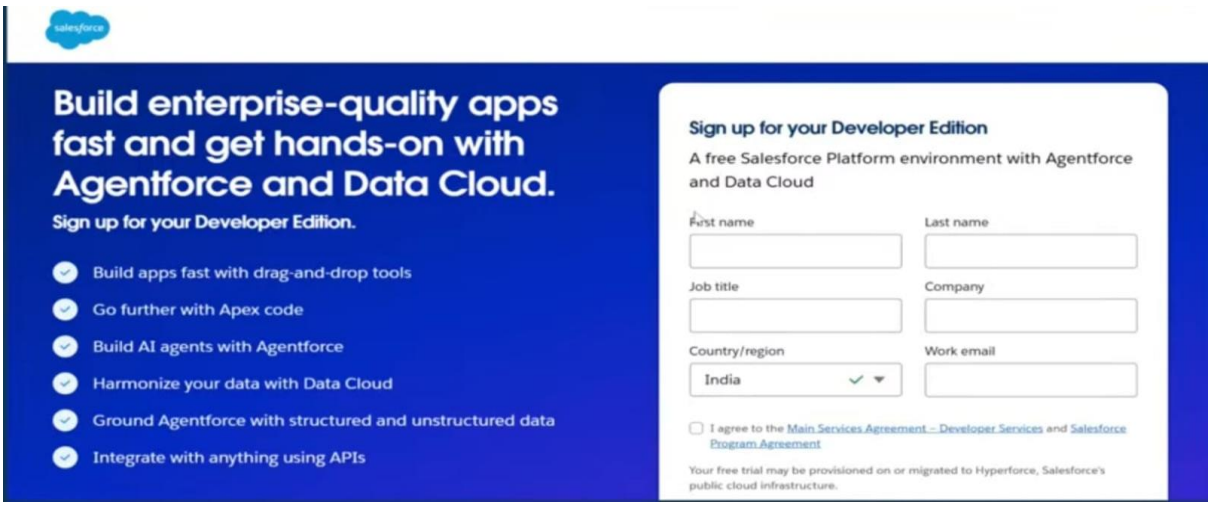
Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

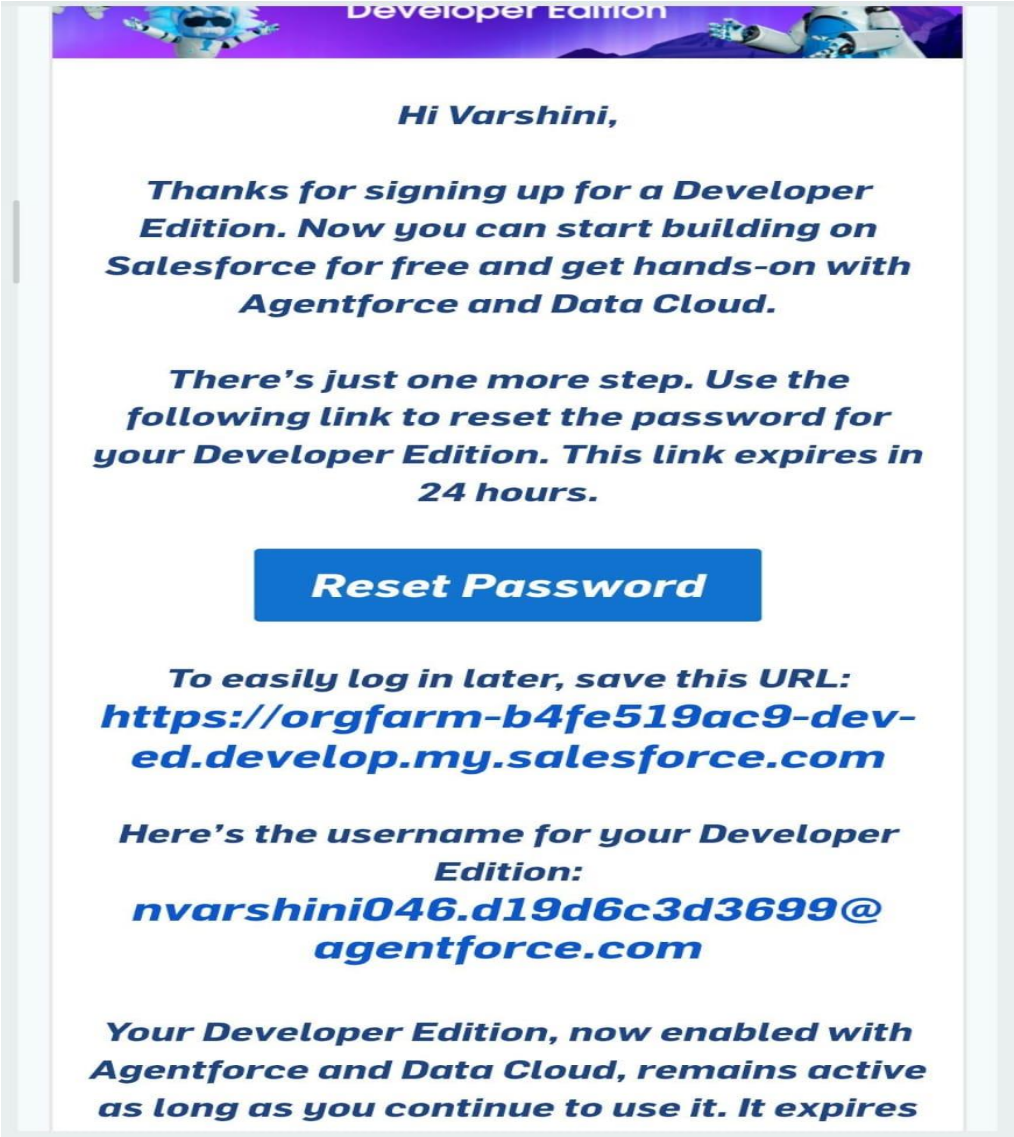
1. Go to https://developer.salesforce.com/signup

2. On the sign up form, enter the following details :



Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins
.



Developer Edition

Hi Varshini,

Thanks for signing up for a Developer Edition. Now you can start building on Salesforce for free and get hands-on with Agentforce and Data Cloud.

There's just one more step. Use the following link to reset the password for your Developer Edition. This link expires in 24 hours.

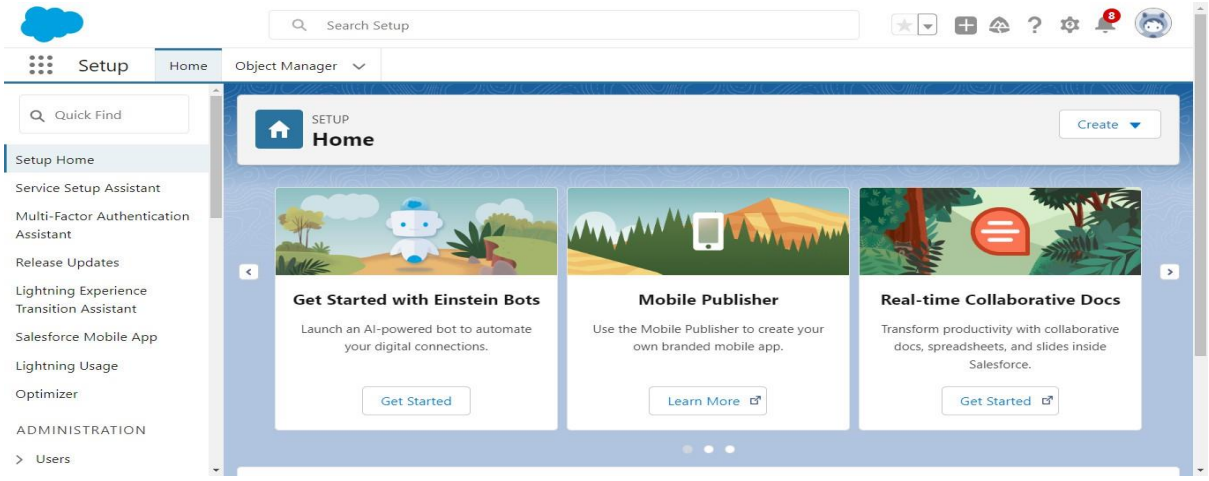
Reset Password

To easily log in later, save this URL:
https://orgfarm-b4fe519ac9-dev-ed.develop.my.salesforce.com

Here's the username for your Developer Edition:
nvarshini046.d19d6c3d3699@agentforce.com

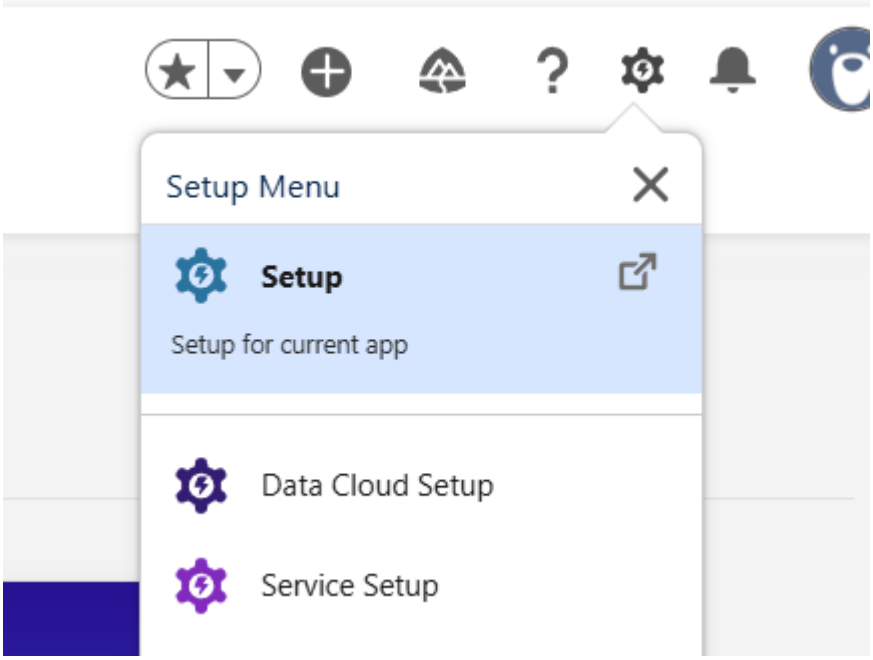
Your Developer Edition, now enabled with Agentforce and Data Cloud, remains active as long as you continue to use it. It expires

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.
4. Then you will redirect to your salesforce setup page.

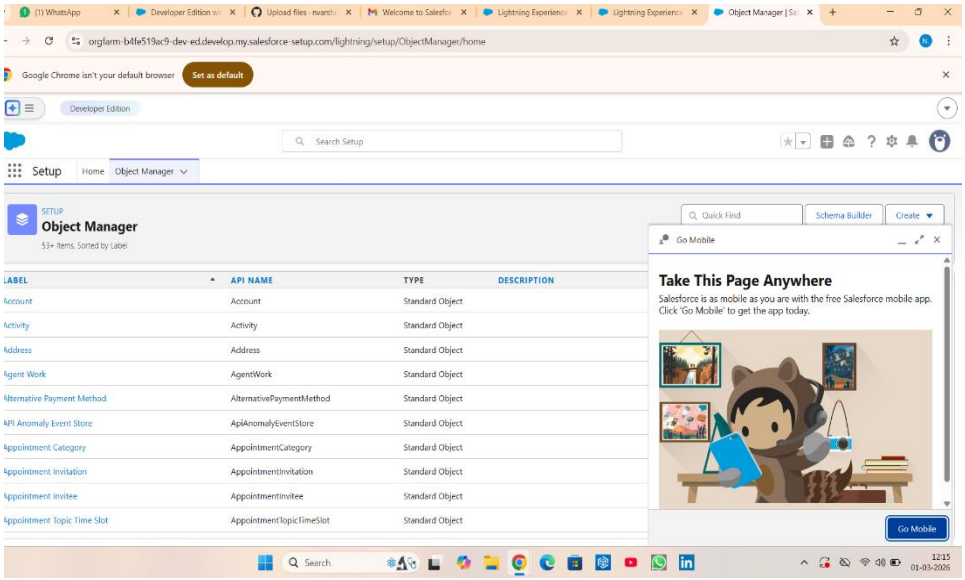


Milestone 2 - Objects

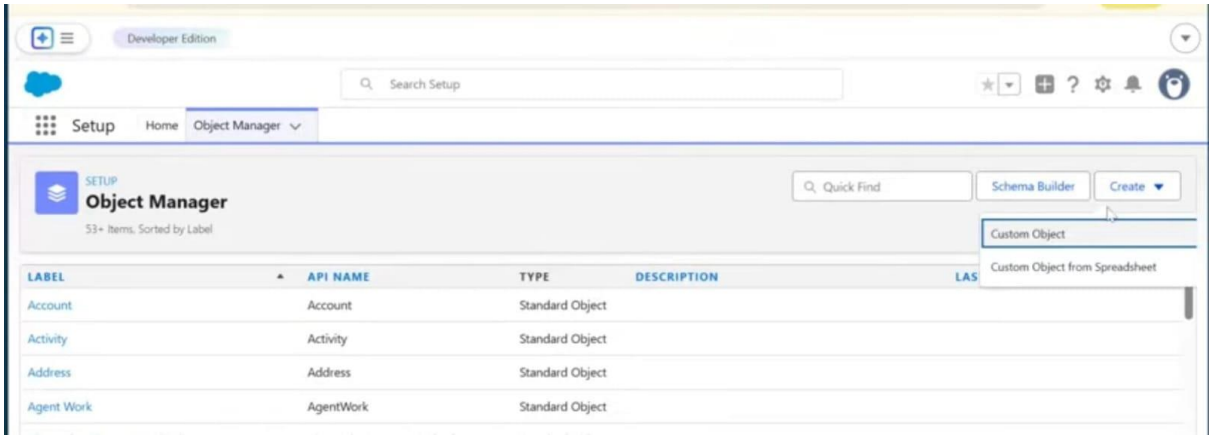
1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup



2.Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.



3. On the Object Manager page, click Create | Custom Object.



Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

   - **Label** : Employer Account
   - **Plural Label** : Employer Accounts
   - Enter Record Name Label and Format
     Record Name : Employer Account Name
     Data Type : Text
   - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
   - **Search Status :** check the box for Allow Search.
   - Save

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

● **Label** : Customer Account
● **Plural Label** : Customer Accounts
● Enter Record Name Label and Format
Record Name : Customer Account Name
Data Type : Text
● **In Optiona**l features : check the boxes for Allow Reports | Allow Activities | Track Field History.
● **Search Status :** check the box for Allow Search.
● Save

Activity 3 : Enterprise Account Object

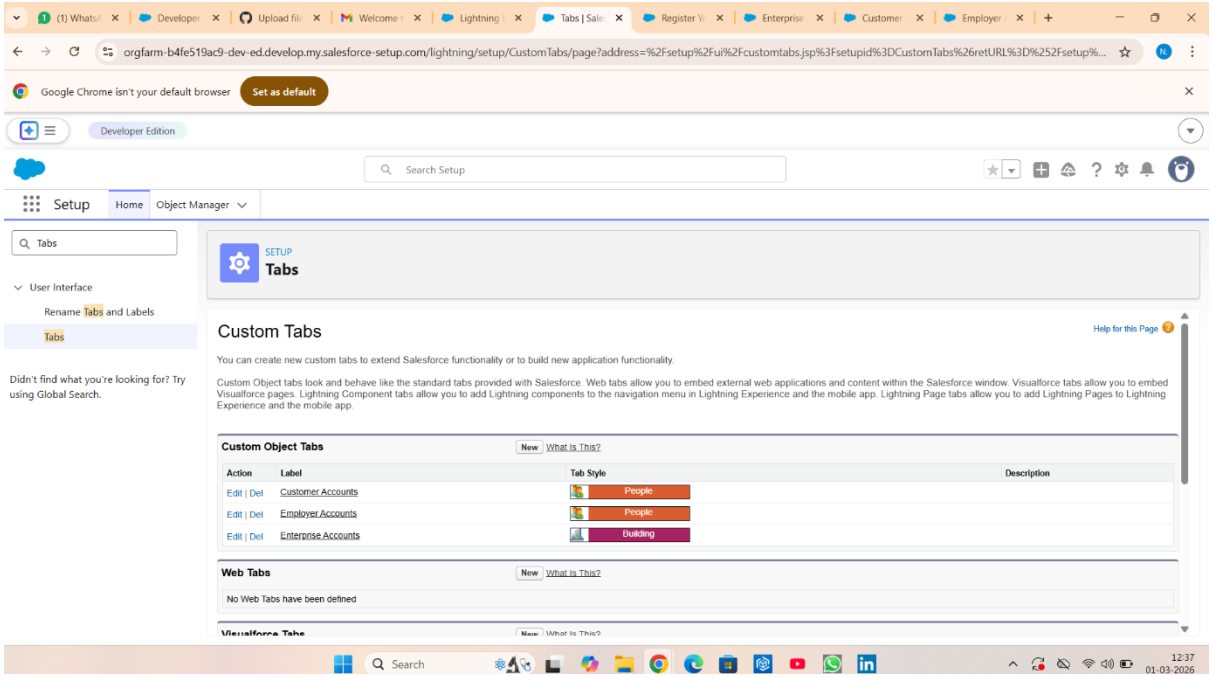
1.From the setup page → Click on Object Manager → Click on Create → Click on

Custom Object.

● **Label** : Enterprise Account
● **Plural Label** : Enterprise Accounts
● Enter Record Name Label and Format
Record Name : Enterprise Account Name
Data Type : Text
● **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
● **Search Status** : check the box for Allow Search.
● Save

Milestone 3 - Tabs Activity

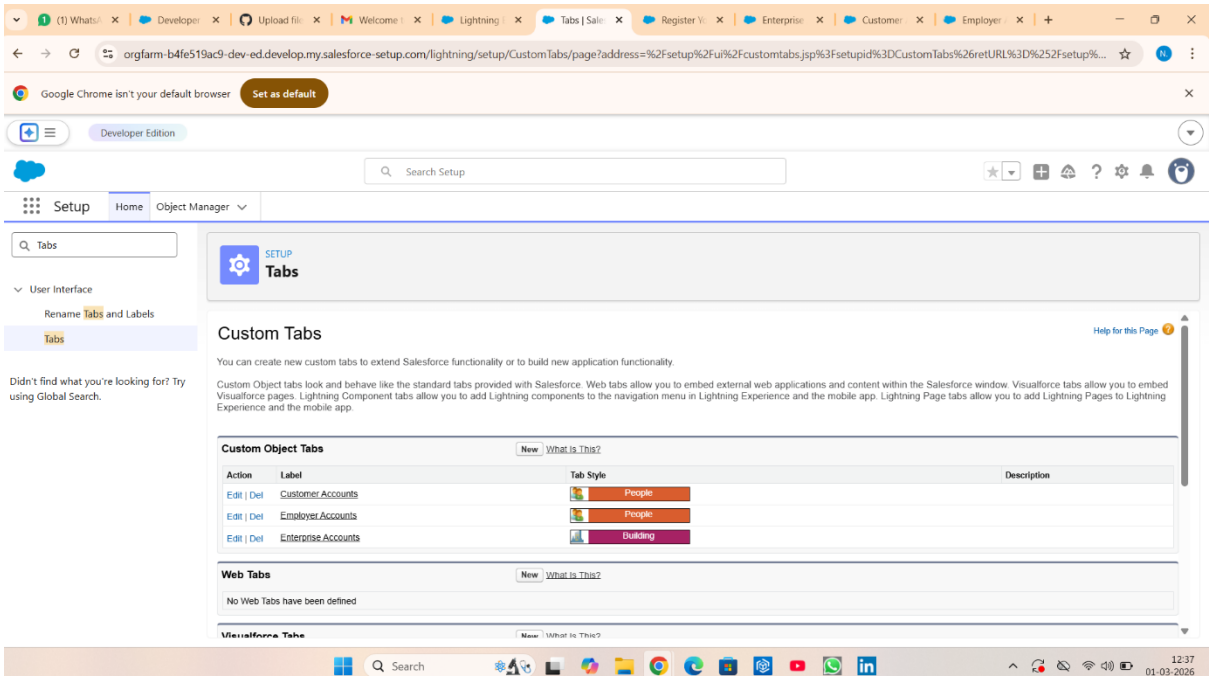
1 : Custom tabs creation 1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)



2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .

3. Make sure that the Append tab to users' existing personal customizations is checked.

4. Click save.



5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 – The Lightning App Activity

Objective:
Create a Lightning App for TheChaiShop&Co in Salesforce.

Step 1: Open App Manager

1. Go to **Setup**.
2. In the **Quick Find** box, search for **App Manager**.
3. Select **App Manager**.
4. Click **New Lightning App**.

Step 2: App Details & Branding
Fill in the required details:

- **App Name:** TheChaiShop&Co
- **Developer Name:** Auto-populates
- **App Logo:** Optional (You may upload an image if required)
- **Primary Color (Hex Code):** Optional (You can leave the default color)

Click **Next**.

Step 3: App Options
Configure the following settings:

- **Navigation Style:** Standard Navigation
- **Setup Experience:** Setup
- **Supported Form Factors:**
  ✓ Desktop
  ✓ Phone

Click **Next**.

Step 4: Utility Items

- **Utility Bar Alignment:** Default

(You may add utility items if required, otherwise keep default settings.)
Click **Next**.

Step 5: Navigation Items
Select the required objects to include in the app:
Custom Objects

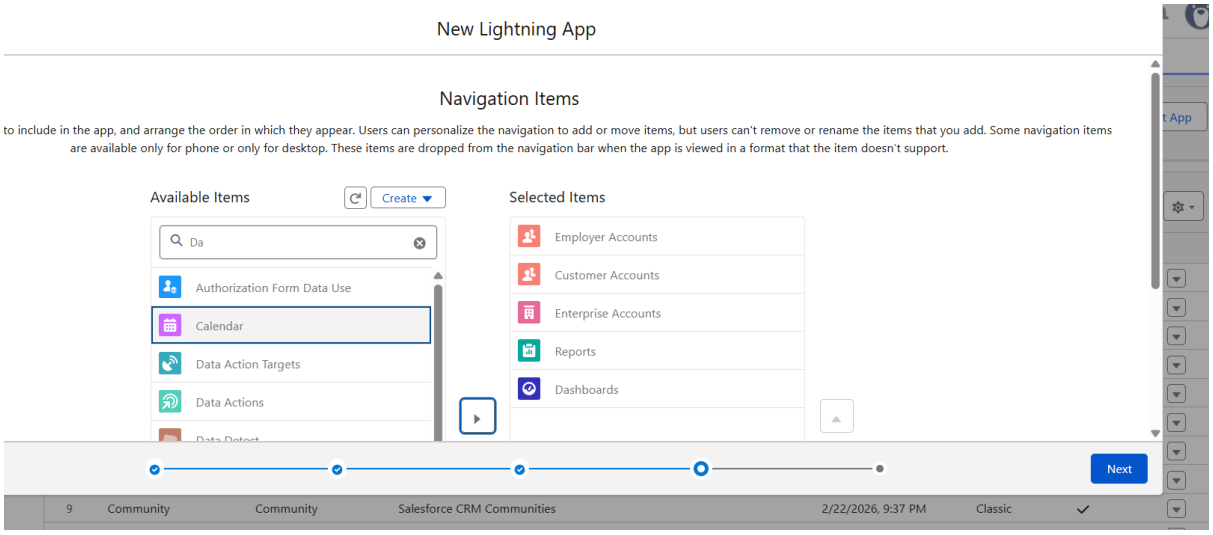
- Customer Accounts
- Employer Accounts
- Enterprise Accounts

Standard Objects

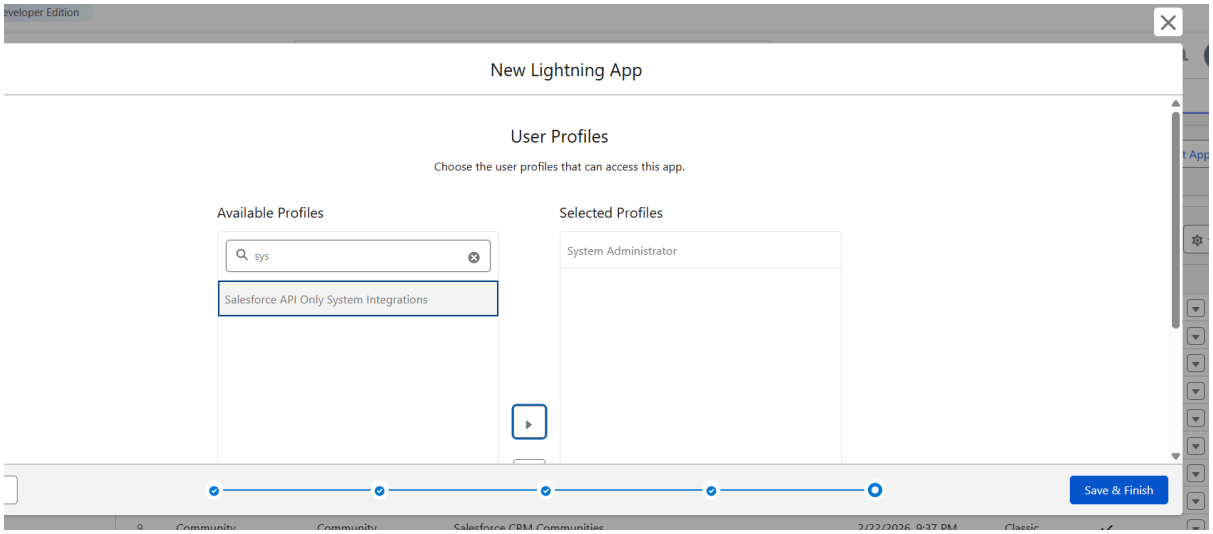
- Reports
- Dashboards

Move the selected items from **Available Items** to **Selected Items**.
Click **Next** → **Save & Finish**.

Outcome
The Lightning App **TheChaiShop&Co** is successfully created with required custom and standard objects, enabling streamlined navigation and centralized access for users.



6. To Add User Profiles : System Administrator



7. Click Save & Finish

Milestone 5 : Global Picklist

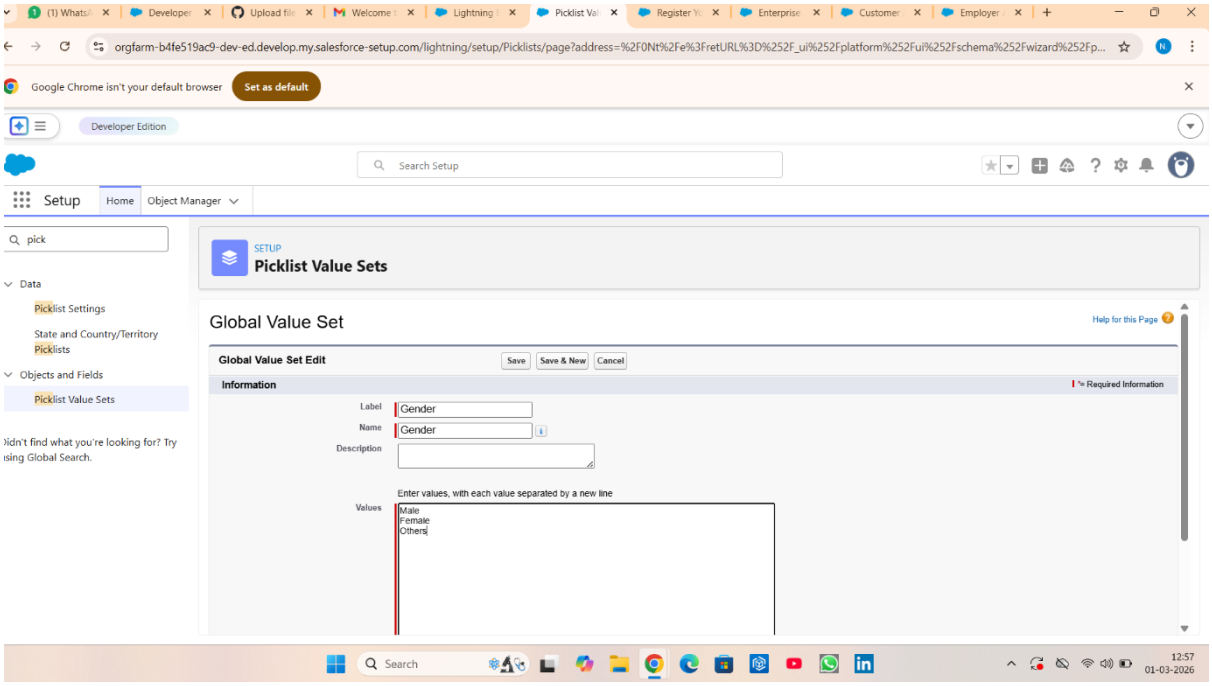
Activity 1 : Create Global PIcklist

1. In Quick find box search for : Picklist value sets and click New.

- **Label :** Gender **Name :** Auto Populates

Values : Male
Female
Others

Click **Save & New.**



2. Create three more Global picklists following the same steps.

Label: Items
Name: (Auto-populates)
Values:

- Platinum Tea Powder
- Double Delight Tea Powder
- Super Dust Tea Powder
- Osmania Biscuits (Value Pack)
- Osmania Biscuits (Premium Pack)
- Dry Fruit Biscuits
- Fruit Biscuits
- Salt Biscuits
- Multigrain Biscuits
- Ragi Biscuits
- Double Choco Chip Cookies
- Butter Almond Cookies
- Melting Moments Cookies
- Honey Oats Cookies
- Delight Box
- Signature Box
- Assorted Box

Click **Save & New**

Global Picklist
Label: Payment Mode
Name: (Auto-populates)
Values:

- Gpay
- PhonePe
- Paytm
- Credit or Debit card
- Cash

Click **Save & New**

Global Picklist
Label: Type of Items
Name: (Auto-populates)
Values:

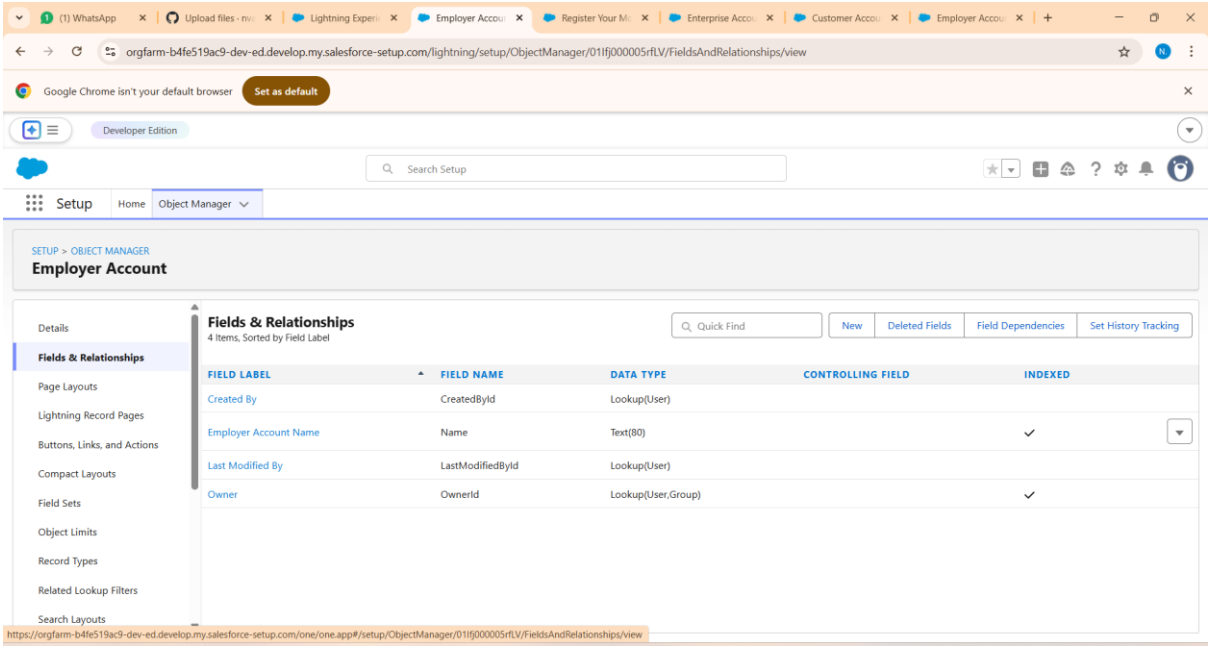
- Tea powder
- Cookies
- Gift Hampers

Click **Save**

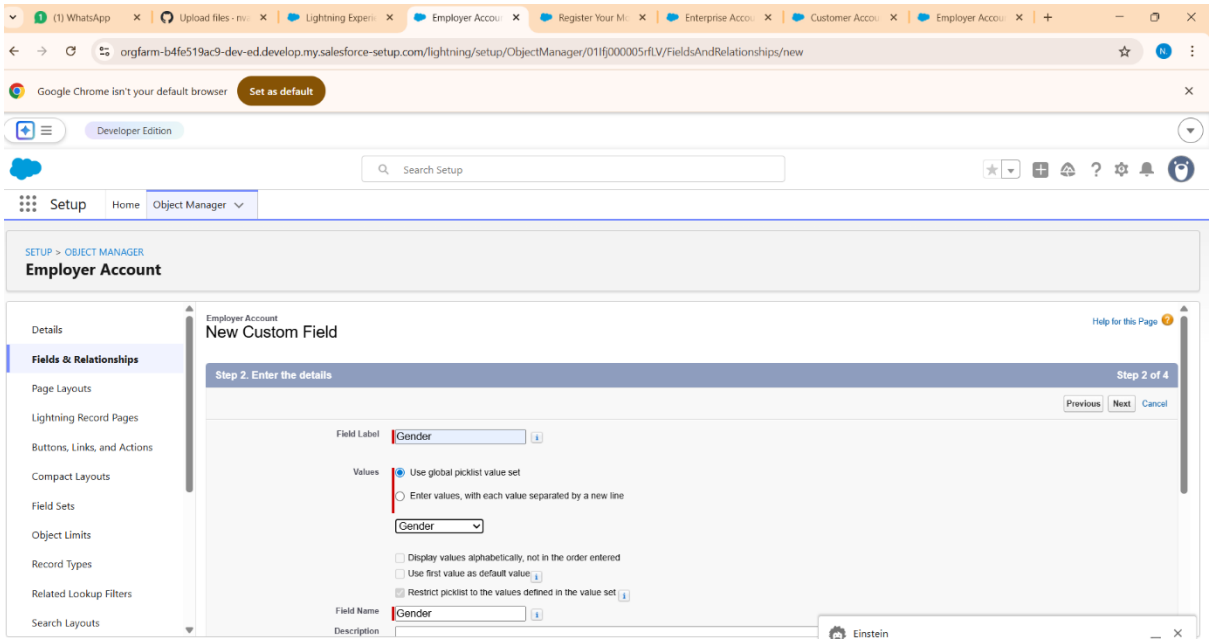
Milestone 6 : Fields & Relationships

Activity 1 : Create Custom fields for Employer Account

1. Helps store additional business-specific information that standard fields do not cover.
2. Improves data organization by structuring information clearly within the object.
3. Enhances reporting accuracy by allowing detailed and customized reports.
4. Supports automation through workflows, validation rules, flows, and approval processes.
5. Improves user experience by capturing only relevant and required data.
6. Enables better decision-making with more meaningful and structured data.
7. Increases system flexibility to match organizational requirements.
8. Helps maintain data consistency by applying field-level validation rules.
9. Allows better tracking of employer-specific details such as status, category, or payment terms.
10. Supports integration with other systems by storing required external reference data.
11. Enhances data security through field-level security and profile-based access control.
12. Reduces manual errors by making important fields mandatory.
13. Improves data visibility for different teams like sales, HR, and finance.
14. Makes dashboards more insightful by providing customized data points.
15. Ensures scalability as new business requirements can be accommodated easily.



6. Next, choose a data type as Text. Choosing a data type helps you format the field input.
7. Click on next



8. First Name

- **Data Type:** Text
- **Field Label:** First Name
- **Field Name:** Auto-populates
- **Length:** 25
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

9. Remaining Fields
Repeat the same steps for the following fields:

Last Name
- **Data Type:** Text
- **Field Label:** Last Name
- **Field Name:** Auto-populates
- **Length:** 25
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

Gender
- **Data Type:** Picklist
- **Field Label:** Gender
- **Values:** Use **Global Picklist Value Set** → Select **Gender**
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & Ne**

Phone Number
- **Data Type:** Phone
- **Field Label:** Phone Number
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

Email ID
- **Data Type:** Email
- **Field Label:** Email ID
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

Date of Birth
- **Data Type:** Date
- **Field Label:** Date of Birth
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

Aadhar Number
- **Data Type:** Text
- **Field Label:** Aadhar Number
- **Field Name:** Auto-populates
- **Length:** 12
- Click **Next** → **Next** → **Save & New**

PAN Details
- **Data Type:** Text
- **Field Label:** PAN Details
- **Field Name:** PAN_Details
- **Length:** 10

- Click **Next** → **Next** → **Save & New**

Designation

- **Data Type:** Picklist
- **Field Label:** Designation
- **Field Name:** Auto-populates
- **Values:** Enter each value on a new line:
    - Manager
    - Finance and Accounting
    - Kitchen Staff
    - Cashier
    - Servers
- Click **Next** → **Next** → **Save & New**

Salary

- **Data Type:** Currency
- **Field Label:** Salary
- **Field Name:** Auto-populates
- Click **Next** → **Next** → **Save**

Activity 2: Create Custom fields for Customer Account

1. First Name

- **Data Type:** Text
- **Field Label:** First Name
- **Field Name:** Auto-populates
- **Length:** 25
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

2. Last Name

- **Data Type:** Text
- **Field Label:** Last Name
- **Field Name:** Auto-populates
- **Length:** 25
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

3. Gender

- **Data Type:** Picklist
- **Field Label:** Gender
- **Values:** Use **Global Picklist Value Set** → Select **Gender**
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

4. Phone Number

- **Data Type:** Phone
- **Field Label:** Phone Number
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

5. Date of Birth

- **Data Type:** Date
- **Field Label:** Date of Birth
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

6. Date of Birthday is Today?

- **Data Type:** Formula
- **Field Label:** Date of Birthday is Today?
- **Field Name:** Auto-populates
- **Formula Return Type:** Checkbox

Formula:

```
IF(
AND(
DAY(TODAY()) = DAY(Date_of_Birth__c),
MONTH(TODAY()) = MONTH(Date_of_Birth__c)
),
TRUE,
FALSE
)
```

- Click **Next** → **Next** → **Save & New**

7. Email ID

- **Data Type:** Email
- **Field Label:** Email ID
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

8. Address

- **Data Type:** Text
- **Field Label:** Address
- **Field Name:** Auto-populates
- **Length:** 125
- Click **Next** → **Next** → **Save & New**

9. Type of Items

- **Data Type:** Multi-Select Picklist
- **Field Label:** Type of Items
- **Values:** Use **Global Picklist Value Set** → Select **Type of Items**
- **Field Name:** Auto-populates

- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

10. Products Purchased

- **Data Type:** Multi-Select Picklist
- **Field Label:** Products Purchased
- **Values:** Use **Global Picklist Value Set** → Select **Items**
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

11. Chai

- **Data Type:** Multi-Select Picklist
- **Field Label:** Chai
- **Values:** Enter each value on a new line:
  - TheChaiShop&Co Special Tea
  - Single Tea
  - Masala Tea
  - Lemon Tea
  - Ginger Tea
  - Green Tea
  - Sugar Free Tea
- Click **Next** → **Next** → **Save & New**

12. Payment Mode

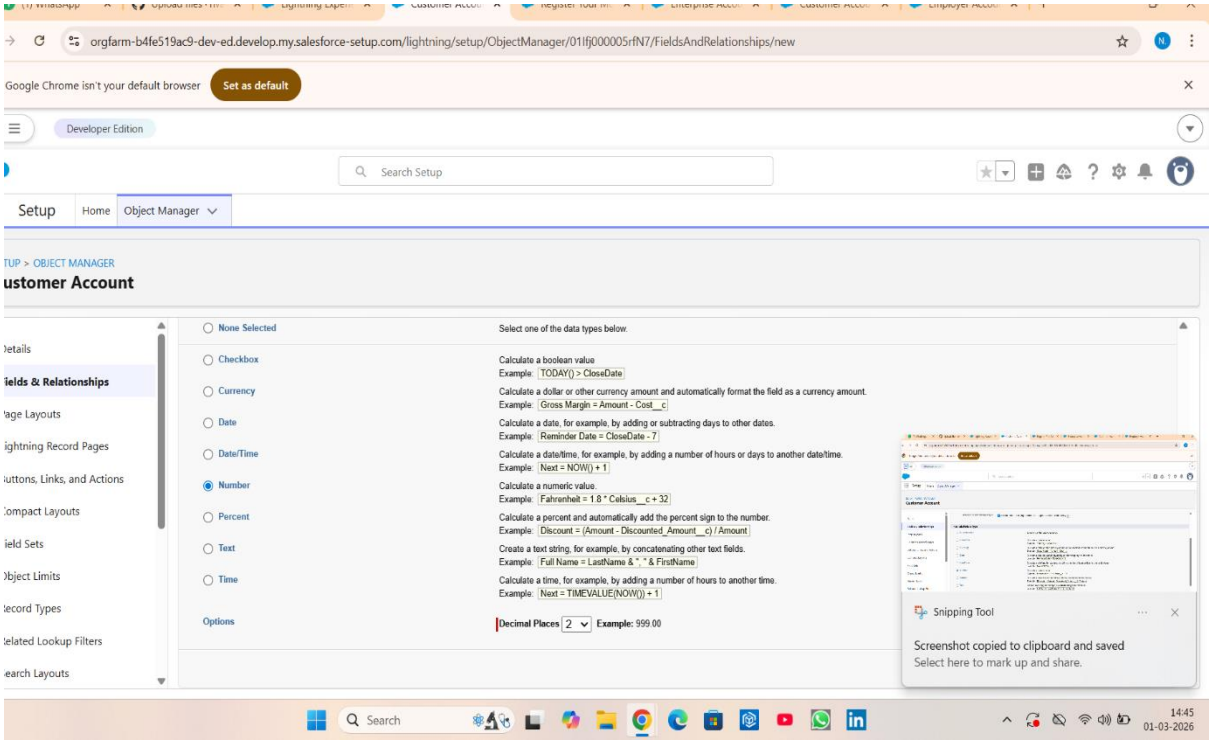
- **Data Type:** Picklist
- **Field Label:** Payment Mode
- **Values:** Use **Global Picklist Value Set** → Select **Payment Mode**
- **Field Name:** Auto-populates
- **Required:** ✓ Checked
- Click **Next** → **Next** → **Save & New**

13. Associated Employer

- **Data Type:** Lookup Relationship
- **Related To:** Employer Account
- **Field Label:** Associated Employer
- **Field Name:** Auto-populates
- Click **Next** → **Next** → **Save & New**

14. Order Quantity

- **Data Type:** Formula
- **Field Label:** Order Quantity
- **Field Name:** Auto-populates
- **Formula Return Type:** Number



Enter Formula = Quantity (Number) = IF(INCLUDES(Products_Purchased__c
IF(INCLUDES(Products_Purchased__c, "Platinum Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Delight Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Super Dust Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Value Pack)"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Premium Pack)"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Dry Fruit Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Fruit Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Salt Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Multigrain Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Ragi Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Choco chip Cookies"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Butter Almond Cookies"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Melting Moments Cookies"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Honey Oats Cookies"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Delight Box"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Signature Box"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Assorted Pack"), 1, 0) +
IF(INCLUDES(Chai__c, "TheChaiShop&Co Special Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Single Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Masala Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Lemon Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Ginger Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Green Tea"), 1, 0) +
IF(INCLUDES(Chai__c, "Sugar Free Tea"), 1, 0)
Click on Next → Next → Save and new.

15. Total Bill

- **Data Type:** Formula
- **Field Label:** Total Bill
- **Field Name:** Auto-populates
- **Formula Return Type:** Number

Enter Formula = Quantity (Number) =

```
IF(INCLUDES(Products_Purchased__c, "Platinum Tea Powder"), 175, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Delight Tea Powder"), 150, 0) +
IF(INCLUDES(Products_Purchased__c, "Super Dust Tea Powder"), 125, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Value Pack)"), 50, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Premium Pack)"), 80, 0) +
IF(INCLUDES(Products_Purchased__c, "Dry Fruit Biscuits"), 110, 0) +
IF(INCLUDES(Products_Purchased__c, "Fruit Biscuits"), 160, 0) +
IF(INCLUDES(Products_Purchased__c, "Salt Biscuits"), 110, 0) +
IF(INCLUDES(Products_Purchased__c, "Multigrain Biscuits"), 170, 0) +
IF(INCLUDES(Products_Purchased__c, "Ragi Biscuits"), 190, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Choco chip Cookies"), 200, 0) +
IF(INCLUDES(Products_Purchased__c, "Butter Almond Cookies"), 110, 0) +
IF(INCLUDES(Products_Purchased__c, "Melting Moments Cookies"), 150, 0) +
IF(INCLUDES(Products_Purchased__c, "Honey Oats Cookies"), 160, 0) +
IF(INCLUDES(Products_Purchased__c, "Delight Box"), 850, 0) +
IF(INCLUDES(Products_Purchased__c, "Signature Box"), 1500, 0) +
IF(INCLUDES(Products_Purchased__c, "Assorted Pack"), 600, 0) +
IF(INCLUDES(Chai__c, "TheChaiShop&Co Special Tea"), 70, 0) +
IF(INCLUDES(Chai__c, "Single Tea"), 50, 0) +
IF(INCLUDES(Chai__c, "Masala Tea"), 60, 0) +
IF(INCLUDES(Chai__c, "Lemon Tea"), 40, 0) +
IF(INCLUDES(Chai__c, "Ginger Tea"), 55, 0) +
IF(INCLUDES(Chai__c, "Green Tea"), 45, 0) +
IF(INCLUDES(Chai__c, "Sugar Free Tea"), 55, 0)

Activity 3: Create Custom fields for Enterprise Account

1. Field Creation

Data Type: Text
Field Label: Enterprise Name
Field Name: Auto Populates
Length: 25
Required: Check the box
Click **Next** → **Next** → **Save & New**

2. Field Creation

Data Type: Phone
Field Label: Phone Number
Field Name: Auto Populates
Required: Check the box
Click **Next** → **Next** → **Save & New**

3. Field Creation
Data Type: Email
Field Label: Email ID
Field Name: Auto Populates
Required: Check the box
Click **Next** → **Next** → **Save & New**

4. Field Creation
Data Type: Text
Field Label: Address
Field Name: Auto Populates
Length: 125
Click **Next** → **Next** → **Save & New**

5. Field Creation
Data Type: Multi-Select Picklist
Field Label: Type of Items
Values: Use Global Picklist Value Set and select **Type of Items** from the dropdown
Field Name: Auto Populates
Required: Check the box
Click **Next** → **Next** → **Save & New**

6. Field Creation
Data Type: Multi-Select Picklist
Field Label: Products Purchased
Values: Use Global Picklist Value Set and select **Items** from the dropdown
Field Name: Auto Populates
Required: Check the box
Click **Next** → **Next** → **Save & New**
7. Field Creation
Data Type: Lookup Relationship
Related To: Employer Account
Field Label: Associated Employer
Field Name: Auto Populates
Click **Next** → **Next** → **Save & New**

8. Field Creation
Data Type: Formula
Field Label: Order Quantity
Field Name: Auto Populates
Formula Return Type: Number
Enter Formula = Quantity (Number) =
IF(INCLUDES(Products_Purchased__c, "Platinum Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Delight Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Super Dust Tea Powder"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Value Pack)"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Osmania Biscuits (Premium Pack)"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Dry Fruit Biscuits"), 1, 0) +

IF(INCLUDES(Products_Purchased__c, "Fruit Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Salt Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Multigrain Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Ragi Biscuits"), 1, 0) +
IF(INCLUDES(Products_Purchased__c, "Double Choco chip Cookies"), 1, 0) +

IF(INCLUDES(Products_Purchased__c, "Delight Box"), 850, 0) +
IF(INCLUDES(Products_Purchased__c, "Signature Box"), 1500, 0) +
IF(INCLUDES(Products_Purchased__c, "Assorted Pack"), 600, 0)

10.Data Type : Picklist
Field Label : Payment Mode
Values : Use Global Picklist value set and select Payment Mode from the dropdown menu.
Field **Name :** Auto Populates.
Required : Check the box
Click on Next → Next → Save

Milestone 7 : Page Layouts

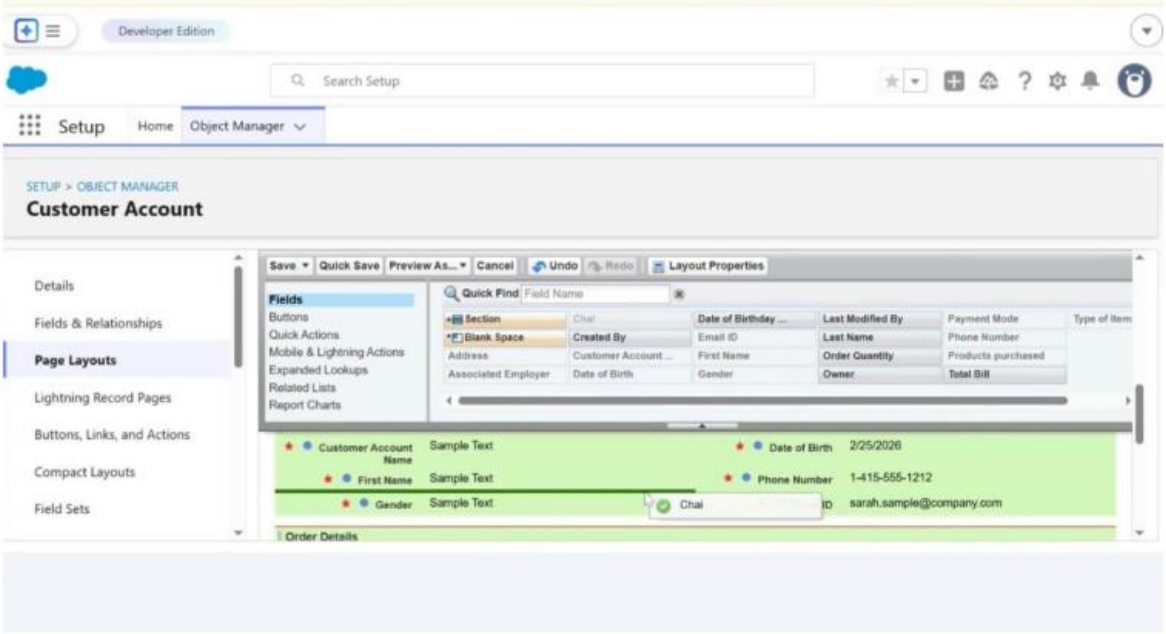
For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

Online Orders Layout

1. Go to **Setup**.
2. Navigate to **Object Manager**.
3. Search and select **Customer Account**.
4. Click **Page Layouts**.
5. Click **New**.
6. Enter **Page Layout Name:** Online Orders
7. Click **Save**.
8. Drag and arrange the required fields in the layout.
9. Click **Save**.

Walk-In Orders Layout

1. Go to **Setup**.
2. Navigate to **Object Manager**.
3. Search and select **Customer Account**.
4. Click **Page Layouts**.
5. Click **New**.
6. Enter **Page Layout Name:** Walk-In Orders
7. Click **Save**.
8. Drag and arrange the required fields in the layout.
9. Click **Save**.



Milestone 8: Record Types

Online Order Record Type

1. Go to **Setup**.
2. Navigate to **Object Manager**.
3. Search and select **Customer Account**.
4. Click **Record Types**.
5. Click **New**.
6. Fill in the details:
   - **Existing Record Type:** Master
   - **Record Type Label:** Online Order
   - **Record Type Name:** Auto Populates
   - **Active:** Check the box
7. In **Assign Page Layouts**, select **Online Orders** layout.
8. Click **Save & New**.

Walk-In Order Record Type

1. Click **New** under Record Types.
2. Fill in the details:
   - **Existing Record Type:** Master
   - **Record Type Label:** Walk-In Order
   - **Record Type Name:** Auto Populates
   - **Active:** Check the box
3. In **Assign Page Layouts**, select **Walk-In Orders** layout.
4. Click **Save**.

Milestone 9 – Validation Rules Activity 1

Object: Employer Account

Navigation Steps

1. Go to **Setup** (Gear Icon).
2. Click **Object Manager**.
3. Select **Employer Account** object.
4. Click **Validation Rules**.
5. Click **New**.

Validation Rule Details

Rule Name:

Aadhar_Number

Error Condition Formula:

```
OR(
   ISBLANK(Aadhar_Number__c),
   LEN(Aadhar_Number__c)
   NOT(REGEX(Aadhar_Number__c"^[1-9][0-9]{11}$"))
)
```

What This Formula Checks:

- Aadhaar number **cannot be blank**
- Must be **exactly 12 digits**
- Must contain **only numeric digits**
- Must **not start with 0**

Error Message:

Aadhar number is required. The Aadhar number must be 12 digits long. Aadhar number can only contain numeric digits. Aadhar number never starts with 0.

Error Location:

Select **Field** → Choose **Aadhar_Number__c**

Final Step

Click->Save->&New(toaddanothervalidationrule)

Activity 1: Employer Account

Repeat the same steps

Setup → Object Manager → **Employer Account** → Validation Rules → **New**

Validation Rule 1

Rule Name:

PAN_Number

Correct Error Condition Formula:

```
OR(
   ISBLANK(PAN_Number__c),
   NOT(REGEX(PAN_Number__c"^[A-Z]{5}[0-9]{4}[A-Z]{1}$"))
)
```

What This Checks:

- Field cannot be blank

- Must follow PAN format:
  5 uppercase letters + 4 digits + 1 uppercase letter
  (Example: ABCDE1234F)

Error Message:
The PAN Details field must not be blank. The PAN card number must follow valid format (Example: ABCDE1234F). Special characters are not allowed.
➡ **Click Save & New**

Validation Rule 2
Rule Name:
Phone_Number
Correct Error Condition Formula:

```
OR(
   ISBLANK(Phone_Number__c),
   NOT(REGEX(Phone_Number__c"^[1-9][0-9]{9}$"))
)
```

What This Checks:
- Field cannot be blank
- Must be exactly 10 digits
- Only numeric digits allowed
- Cannot start with 0

Error Message:
The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)
➡ **Click Save**

Activity 2: Customer Account

Navigation
Setup → Object Manager → **Customer Account** → Validation Rules → **New**

Validation Rule
Rule Name:
Phone_Number
Error Condition Formula:

```
OR(
   ISBLANK(Phone_Number__c),
   NOT(REGEX(Phone_Number__C"^[1-9][0-9]{9}$"))
)
```

Error Message:
The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)
➡ **Click Save**

Activity 3: Validation Rule on Customer Account Object

Step 1: Navigate to Object

1. Go to **Setup**
2. Click **Object Manager**
3. Select **Customer Account**
4. Click **Edit**

Step 2: Create Validation Rule

1. Click **Validation Rules**
2. Click **New**

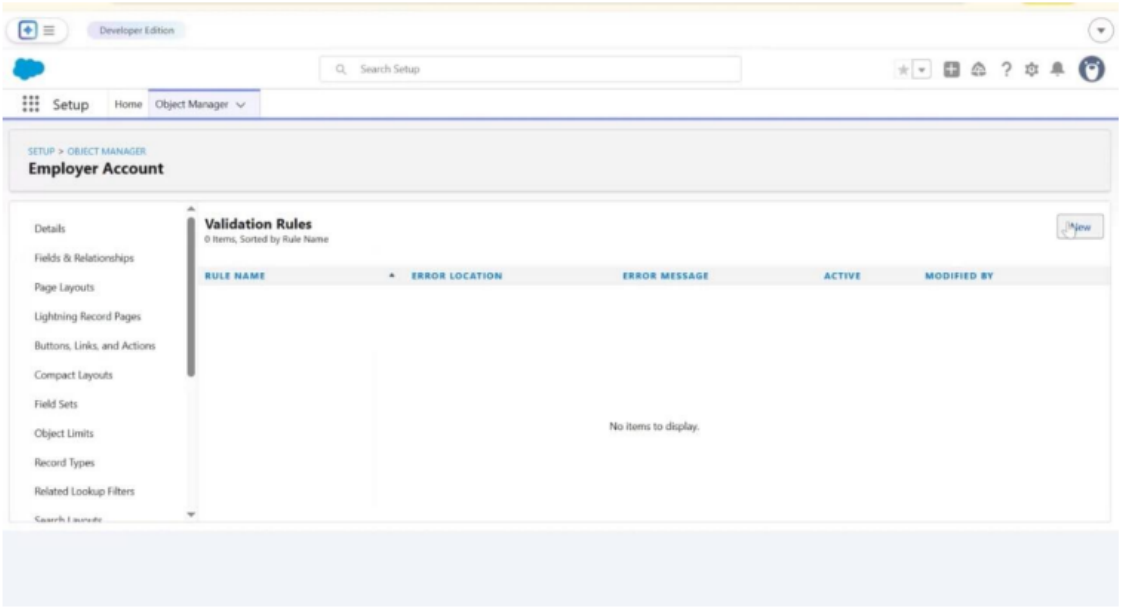
Step 3: Enter Rule Details

Rule Name:

Phone_Number_Validation

Error Condition Formula:

```
AND(
NOT(ISBLANK(Phone_Number__c)),
NOT(REGEX(Phone_Number__c, "^[1-9]{10}$")),
NOT(REGEX(Phone_Number__c, "^\\d+$"))
)
```



Error Message:

The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.).

Choose **Error Location**: Field → Phone_Number__c
4.Click **Save**

Milestone 10 – Email Template

Activity 1: Create Classic Email Template

Step 1: Navigate to Email Template

1. Go to **Setup**
2. In Quick Find, type **Email Templates**
3. Click **Classic Email Templates**
4. Click **New Template**

Step 2: Choose Template Type

- Select **Text**
- Click **Next**

Step 3: Configure Template
Folder:
Unfiled Public Classic Email Templates
✓ Check **Available For Use**
Email Template Name:
Birthday Offer Email
Template Unique Name:
(Auto-populated)
Subject:
Special Birthday Offer Inside!

Step 4: Add Merge Field
Under **Available Merge Fields**:

- Select Field Type → **Customer Account Fields**
- Select Field → **First Name**
- Copy merge field value
- Paste it into the email body where needed

Email Body:
Dear {!Customer_Account__c.First_Name__c},

Happy Birthday from all of us at TheChaiShop&Co! 🎉🎂 We hope your special day is filled with joy, laughter, and wonderful memories.

To celebrate your birthday, we have a special gift just for you! As a token of our appreciation for your continued support, we're delighted to offer you an exclusive birthday discount.

🎁 Birthday Offer: Enjoy a fantastic 50% off on your next purchase as our birthday gift to you!

This offer is our way of saying thank you for being a valued customer. Simply use the

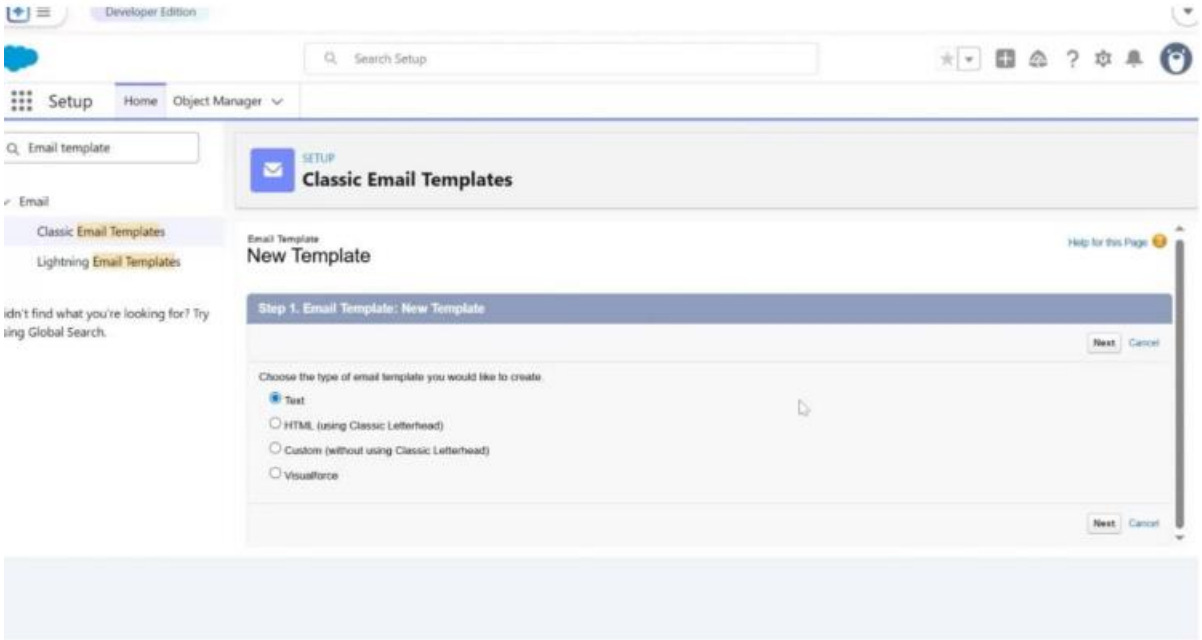
code HBDAY50 at checkout to redeem your birthday treat.

We hope this special offer adds a little extra sparkle to your birthday celebrations!

Once again, happy birthday! Thank you for choosing TheChaiShop&Co! and being part of our community.

Warm regards,
TheChaiShop&Co!

Final Step
Click **Save**



Activity 2: Create Email Alert

Step 1: Navigate to Email Alert

1. Go to **Setup**
2. In Quick Find, type **Email Alerts**
3. Click **Email Alerts**
4. Click **New Email Alert**

Step 2: Enter Email Alert Details

- **Description:** Happy Birthday Email Alert
- **Unique Name:** (Auto-populates)
- **Object:** Customer Account
- **Email Template:** Search and select **Birthday Offer Email**
- **Recipient Type:** Email Field
- **Email Field:** Email ID
- **From Email Address:** Default Workflow User's Email Address

Click **Save**

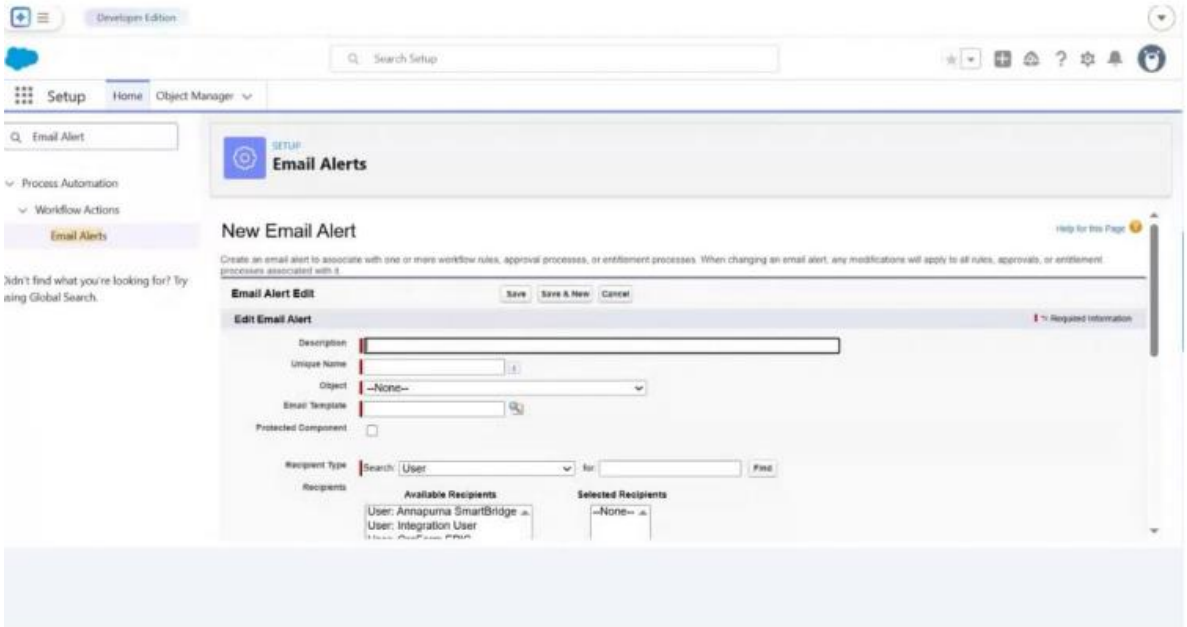
1. Go to **Setup**
2. Search for **Process Automation Settings**
3. Ensure a user is selected as the Default Workflow User
4. Save if changes are made



Milestone 11 – Flows

Activity 1: Create Scheduled Triggered Flow

This flow will automatically send birthday emails daily.

Step 1: Create New Flow

1. Go to **Setup**
2. Search **Flows**
3. Click **New Flow**
4. Select **Schedule-Triggered Flow**
5. Click **Create**

Step 2: Set Schedule

- **Start Date:** Choose desired start date
- **Start Time:** Choose time
- **Frequency:** Daily

Click **Done**

Step 3: Configure Object

- **Object:** Customer Account
- **Condition Requirements:** All Conditions Are Met (AND)

Add Conditions:

1. **Field:** Date_of_Birthday_is_today__c
    - Operator: Equals

- Value: $GlobalConstant.True

2. **Field:** Email_ID__c
   - Operator: Is Null
   - Value: $GlobalConstant.False

Click **Done**

Step 4: Add Action

1. Click **(+)** icon in Flow Builder
2. Select **Action**

Step 5: Configure Action

- **Filter By:** Type
- **Action Type:** Email Alert
- **Select Action:** Happy Birthday Email Alert
- **Label:** Send Happy Birthday Email
- **API Name:** Auto-populates

Set Input Values:

- Record ID → {!$Record.Id}

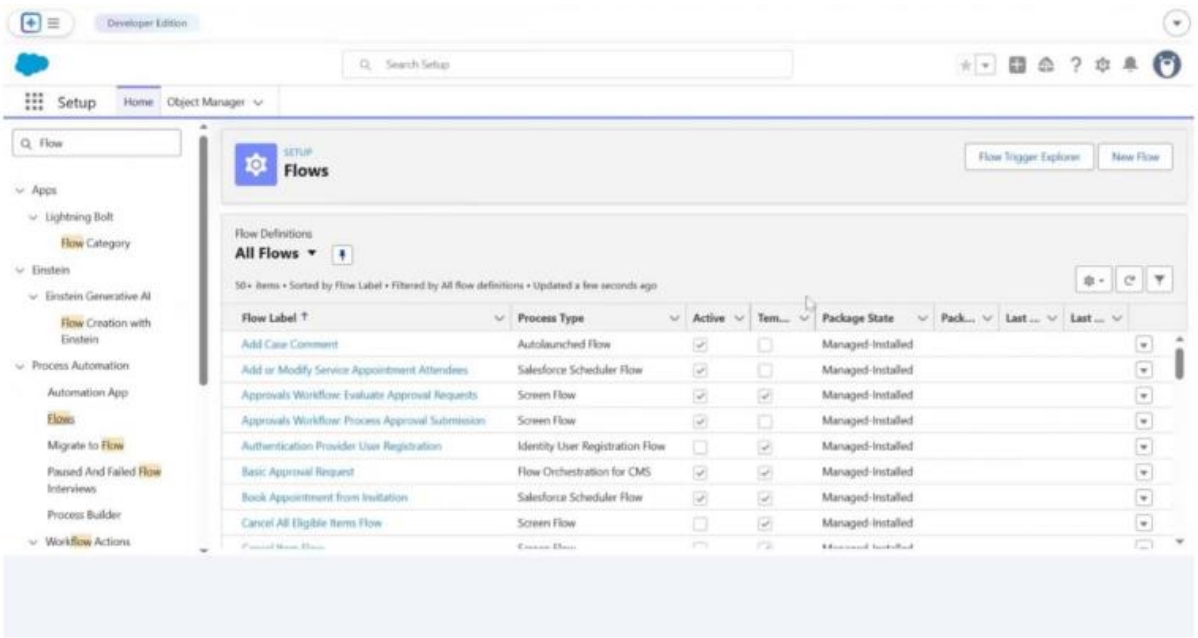
Click **Done**

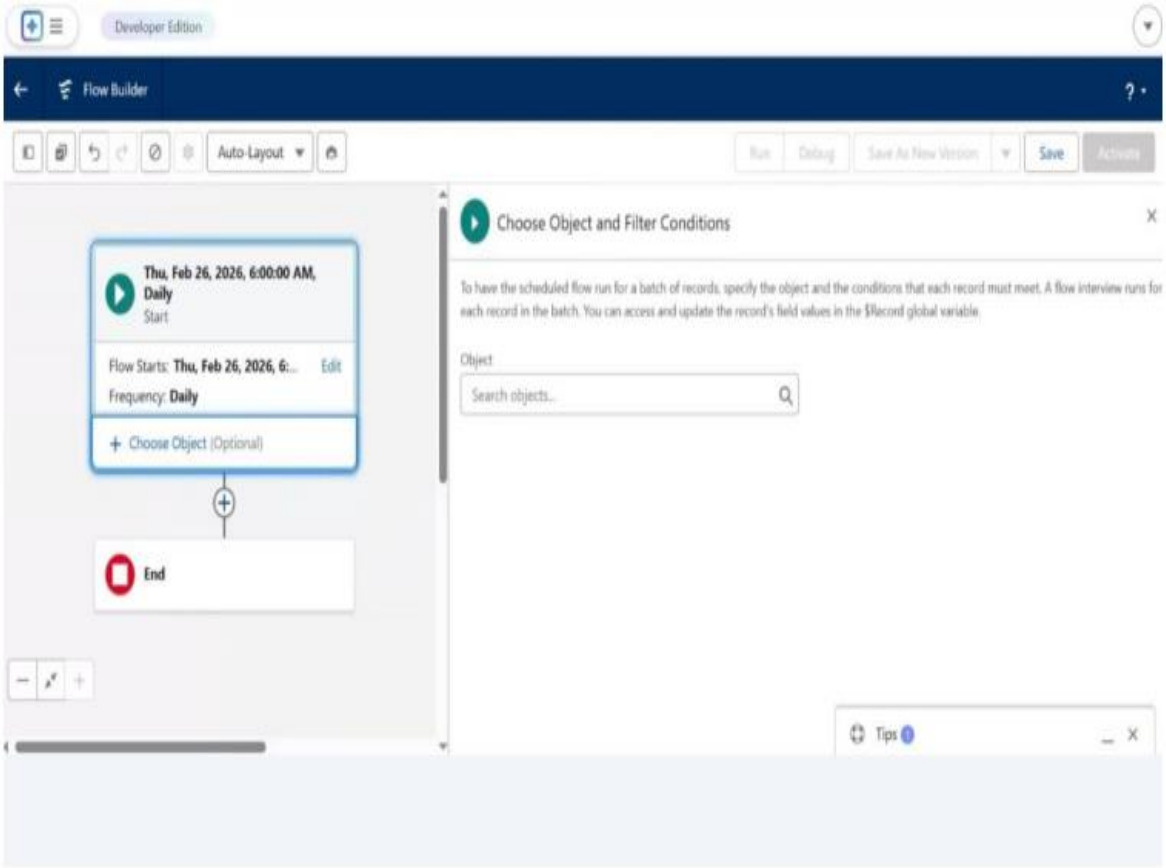
Step 6: Save Flow

1. Click **Save**
2. **Flow Label:** Happy Birthday Email Flow
3. **Flow API Name:** Auto-populates
4. Click **Save**

Final Step (Very Important

Click **Activate** to make the flow run daily.





Milestone 12 – Reports & Dashboards

Activity 1: Customer Account Sales Report

Steps to Create the Report:

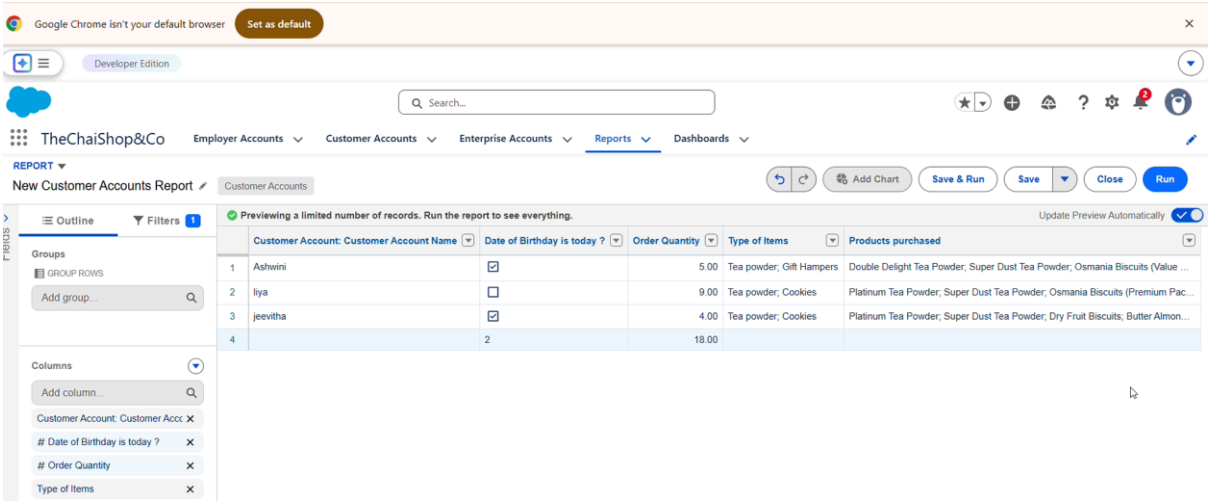
2. Click **New Report**.
3. Search and select **Enterprise Accounts**.
4. Click **Start Report**.
5. Turn **Update Preview Automatically** to **ON**.
6. Drag and drop all required columns from the **Outline pane**.
7. Under **Group Rows**, search and select:
   - **Type of Items**
8. Click **Add Chart**.
9. Click **Save**.
10. Enter:
    - **Report Name:** Enterprise Account Sales Report
    - **Report Unique Name:** (Auto-populated)
11. Click **Save**.

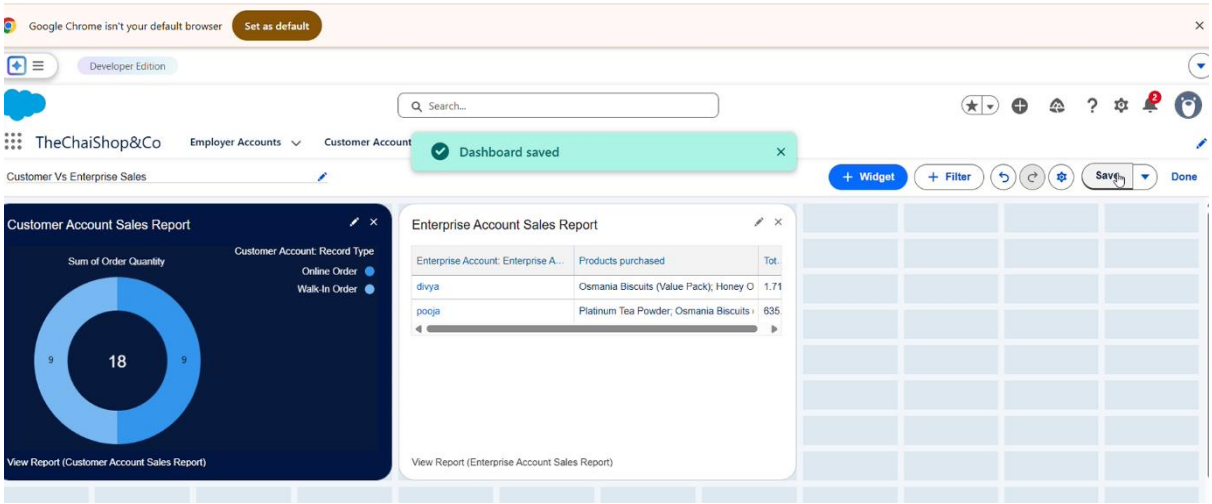


Activity 3: Dashboard reation

Steps to Create Dashboard:

1. Click **Dashboards**.
2. Click **New Dashboard**.

3. Enter:
   - **Name:** Customer Vs Enterprise Sales
4. Click **Create**.
5. Click **Widget**.
6. Select **Chart** or **Table**.
7. Select **Customer Account Sales Report**.
8. Choose **Display As** (Bar Chart / Pie Chart / Table, etc.).
9. Click **Add**.
10. Repeat the same steps for **Enterprise Account Sales Report**.
11. Click **Save**.



Milestone 12 – Conclusion

The development of the CRM application for TheChaiShop&Co has greatly improved operational efficiency and customer relationship management. By integrating employer details, customer data (both online and offline), and enterprise information into a centralized system, the application streamlines business operations and ensures better coordination across different functions. This unified approach enables accurate data management and supports informed decision-making.

The automation features implemented within the system significantly reduce manual workload and minimize errors. Automated calculations for order quantity and total billing ensure accuracy in sales transactions, while reducing dependency on manual computations. Furthermore, the birthday email notification flow enhances customer engagement by enabling personalized communication, helping the business build stronger and long-lasting relationships.

The creation of Reports and Dashboards adds powerful analytical capabilities to the CRM application. Real-time insights into customer and enterprise sales performance allow management to monitor trends, evaluate performance, and make strategic, data-driven decisions. Overall, the system contributes to improved productivity, better customer satisfaction, and sustainable business growth.

7. Functional & Performance Testing

During testing, screenshots were captured from the Salesforce Lightning Interface to verify system functionality:

- Record creation for Employer, Customer, and Enterprise objects
- Validation rule testing (Aadhar, PAN, Phone Number)
- Record types and page layout verification
- Formula field validation (Order Quantity & Total Billing)
- Flow testing for Birthday Email Alerts
- Report and Dashboard generation

Performance testing confirmed:

- Fast response time
- Stable performance during concurrent usage

8. Advantages & Disadvantages

Advantages

- Centralized data management
- Reduced manual work
- Automated billing calculations
- Improved customer engagement
- Real-time analytics and reporting

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Final Conclusion

The CRM Application developed for TheChaiShop&Co significantly enhances overall business efficiency by centralizing customer, employer, and enterprise data within a single integrated platform. By automating core processes such as sales calculations, record management, and data validation, the system reduces manual effort and operational errors. This structured approach ensures accuracy, consistency, and smoother day-to-day business activities.

In addition, the implementation of automated workflows—such as birthday email notifications and billing calculations—strengthens customer engagement and improves service quality. Employees can focus more on delivering personalized service rather than performing repetitive administrative tasks. The reporting and dashboard features provide real-time insights into sales performance, enabling informed and strategic decision-making.

Overall, the CRM solution serves as a scalable and efficient system that supports business growth. Through automation, data integration, and analytical capabilities, TheChaiShop&Co is better equipped to enhance productivity, maintain strong customer relationships, and adapt to future technological advancements.

10. Future Scope

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS notifications
- Inventory management system
- Multi-branch support
- Advanced customer profiling

11. Appendix
